🌐 LinkedIn 🐙 GitHub 🛠 TryHackMe 📦 Hack The Box

Computer Science Engineering graduate with hands on experience in Blue Team cybersecurity, specializing in SIEM tools, SOC operations, DFIR, and Threat Intelligence, with additional interests in penetration testing and red team methodologies. Skilled in log analysis, IDS/IPS, OSINT investigations, and endpoint security tools. Actively enhancing technical capabilities through continuous learning and practical projects and experimentations to develop expertise in emerging field of cybersecurity.

EDUCATION

Bachelor of Engineering / Computer Science Engineering, 2021 – 2025
Anjalai Ammal Mahalingam Engineering College [🔗](#) Kovilvenni, India
CGPA: 7.4

SKILLS

Cybersecurity Concepts:

CIA Triad, SOC Operations, Threat Intelligence, MITRE ATT&CK, Log Analysis, Endpoint security & (EDR), Cyber & Unified Kill Chain.

Languages:

Python, SQL

Operating Systems:

Linux, Windows (Event Logs, Powershell, Sysinternals)

Tools:

Splunk, ELK, Wazuh, Snort, Wireshark, Tshark, Brim, Zeek, Sysinternals, Sysmon, Nmap, Burp Suite.

CERTIFICATES

Google Cybersecurity Professional certificate [🔗](#)

Completed a comprehensive cybersecurity specialization on Coursera

Tryhackme Cybersecurity 101 [🔗](#)

learning path covering networking, Linux, and cybersecurity fundamentals with hands-on labs.

PROJECTS

Enterprise 101

2025

- Built a virtual enterprise network with Active Directory, Windows, Ubuntu, and Wazuh for security monitoring. Simulated attack scenarios and configured systems for intrusion detection, log analysis, and threat response.

Hack The Box Holmes CTF

2025

- Participated in the Capture the Flag event conducted by HackTheBox solved challenges based on DFIR and log analysis

SHA-256 Password Cracking

2024

- Developed a script to crack hashed passwords.
